Challagolla Sravya Chowdary

Hyderabad, Telangana
+91 9490122471 • 23211a0550@bvrit.ac.in • sravya-chowdary0505
sravya5235

Technical Skills

Languages: C, Python, Java, JavaScript, SQL

Frameworks & Tools: ReactJS, Node.js, Express, FastAPI, Tailwind CSS

Databases: MySQL, PostgreSQL

Tools: Git, Docker, Postman, Tableau

Core: Data Structures & Algorithms, DBMS, Operating Systems

Experience

GDG on Campus, BVRIT — **Narsapur, Telangana**
Content & Social Media Lead — *Dec 2025 – Present*

- Led content strategy and social media planning to enhance online presence and engagement.
- Created and managed posts, announcements, and promotional content across platforms.
- Coordinated with team members to ensure consistent branding and timely updates.

Education

B. V. Raju Institute of Technology — **Narsapur**
Bachelor of Technology (B. Tech) in Computer Science, CGPA: 8.45 — *Present*

Vinjee Junior College — **Kukatpally**
Intermediate (MPC), Percentage: 97.1 — *2023*

Projects

YOLO-Powered Smart Drone Surveillance — **GitHub**: *YOLOv8, OpenCV, ROS, Python*

- Built an AI-powered drone navigation system using YOLOv8 and OpenCV for real-time object detection in disaster scenarios.
- Integrated autonomous path planning with ROS to enhance obstacle avoidance and navigation efficiency.

VitalsGraph — **GitHub**: *React (Vite), FastAPI, PostgreSQL*

- Engineered a real-time ICU bed allocation system managing 500+ assets with live occupancy dashboards.
- Implemented triage-based risk scoring and optimized queries using PostgreSQL `tsrange`, CTEs, and GIST indexing for 10k+ admissions.

Real-Time E-Commerce & Inventory Dashboard — **GitHub**: *MySQL, Python, Streamlit, Pandas*

- Designed a relational database schema using MySQL with Views, Triggers, and Transactions to ensure data integrity.
- Developed a Streamlit dashboard for real-time sales monitoring, revenue analytics, and automated inventory alerts.

Automated Prompt Optimization Using LLMs (ongoing): *Python, LLM APIs*

- Built a framework leveraging LLM-generated prompt variations with metric-based evaluation.
- Improved response quality and consistency through systematic testing and scoring of prompts.

Hackathon Projects

Technova 2025 – Technical Symposium for Women: **Project: DebtEase — Role: Full-Stack Developer**

- Developed a personal finance assistant to recommend optimal debt repayment strategies using **Avalanche** and **Snowball** methods.
- Designed logic to analyze user financial inputs and generate personalized repayment plans based on interest rates and user priorities.

Certifications

Winners in R&D Showcase: Won first prize from CSE Department for Smart Drone Surveillance during Disaster Response

NPTEL: Joy Of Computing using Python, April 2024; Programming in Java, May 2025

CISCO: CPA: Programming Essentials in C++, January 2025

DELOITTE: Data Analytics Job Simulation, June 2025; Technology Job Simulation, July 2025
